Chop Footage Chart

To get an idea of how much moulding is required to make a frame you can use our chart below. Note, however, that is just a guideline. If you are purchasing length to do your own chops we suggest ordering at least 10% more, and as much as 25% if the frames are large or if you are ordering less than 50'. With few exceptions, this chart displays the footage we will charge you when ordering chops from us. If you want to know exactly, call us for a quote and we will give you the actual amount from our computer system, including all surcharges or discounts that may be applicable on your individual order.

Key -->	A*	B	C	D	E	F	G	H	I	J	K	L
	0	5/16	3/8	7/16	1/2	3/4	1	1-1/4	1-1/2	1-3/4	2-1/4	2-3/4
Feet	Maximum United Inches by Frame Size

1. Find the WIDTH KEY of the moulding in question (shown next to profile drawing in catalog).
2. Go down the column until you find the FIRST number that is HIGHER than the United Inches**
3. Follow the row horizontally to the FEET column.

EXAMPLE: Moulding #122, chopped 16 x 20:
 Width Key = B, United Inches = 36
 First number under column B that is higher than 36 is 39.25
 Follow horizontally to the left, 7'

* the A column is also used when Outside Dimension is specified.
 ** United Inches = frame dimension Length + Width (if ordering Straight Cut Chop, add two more inches).
